

GitHub Stage, Commit, and Push

Stage activities:

- Open PowerShell, a terminal window, or cmd
- Navigate to the directory where your repository is located:
 - to move back to root, type in `cd \` (cd space slash)
 - to move forward from root, use change directory (`cd`) command

```
C:\Users\mesus>cd \  
  
C:\>cd csd/csd-310  
  
C:\CSD\CSD-310>
```

- Enter **git status**
 - note: the first step is to always check the status of your repository to determine whether the changes have been flagged by git

```
C:\CSD\CSD-310>git status  
On branch main  
Your branch is up to date with 'origin/main'.  
  
nothing to commit, working tree clean  
  
C:\CSD\CSD-310>_
```

- Complete any changes; add directories, add files, modify files, etc.
- Stage the changes
 - Enter **git add -all**

```
C:\CSD\CSD-310>git add --all  
  
C:\CSD\CSD-310>
```

Commit your work

- Enter **git commit -m "Updated module-12/final.html"**
 - note: the **-m** command allows you to add a message to the staged code
 - note: always include a meaningful message when committing your work to GitHub

```
C:\CSD\CSD-310>git commit -m "Updated Test File in Mod-5. 5/27/2024"
[main 26c91cf] Updated Test File in Mod-5. 5/27/2024
1 file changed, 0 insertions(+), 0 deletions(-)
rewrite module-5/Sue Sampson.docx (67%)
```

- Enter **git status** to verify the changes were committed
 - note: you should see "nothing to commit, working tree clean." This effectively means the changes were committed.

```
C:\CSD\CSD-310>git status
On branch main
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)

nothing to commit, working tree clean
```

Push your work to GitHub

- Enter **git push origin main**
 - note: the branch will either be named **master** or **main**. Look at the output right above, it tells you the location.. "On branch main"

```
C:\CSD\CSD-310>git push origin main
